

LIFE HyReward Project has received funding from the LIFE+ Programme of the European Commission under grant agreement LIFE20 CCA/ES/001783.

ACTIVITIES

Second Progress Meeting in Sneek (The Netherlands)

The second progress meeting of the LIFE HyReward project was held in November in Sneek (The Netherlands), where a technical and economical analysis of the tasks was performed. The meeting took place on November 29th at the REDstack offices. In addition, the HyReward team had the opportunity to visit the world's largest pilot plant with the RED technology, located in Afsluitdijk.

Second Monitoring Meeting

The second monitoring meeting of the LIFE HyReward project with the external monitoring team, NEEMO (entity in charge of assisting the EASME agency of the European Commission in the monitoring of the LIFE program project), took place the 2nd December of 2022. The meeting was held at the Alicante Desalination Plant.
